

Estonia

What may be the first perfin from Estonia has been reported by Dick Scheper (#3311). He has found

the letter O perforated in an Estonian stamp, Scott #55. The stamp bears a clear cancel

"EESTI/6-1-21." A similar perfin appears on Hungarian stamps. Nothing further is known about the perfin or a possible user. The only pattern shown in the *World Perfin Catalog* for Estonia is clearly a control perforation.
